

MY MOON CAFÉ 20.00

Matthew Grubb

Getting nosy about brain repair

For decades, scientists had assumed that evolution decided long ago to surrender the ability for regeneration of our brain and spinal cord. However, recent unexpected discoveries related to our sense of smell have revealed that this conclusion might have been premature, opening up myriad possibilities for brain repair. Leading neuroscientist Matthew Grubb will delight with an engaging account of how neuroscience is now poised to accelerate towards this long held goal.
