

ART STALKER PRESENTS

SCIENCE CAFÉ
FENS FORUM 2018

8. JULY

ART STALKER 20.00

Asya Rolls

Can the brain cure the body?

The philosophical mind-body problem examines the relationship between the mind, a mental process, and its impact on the body, a physical entity. Such interactions are manifested in modern medicine by the emergence of disease following stress, or recovery in response to placebo treatment. Nevertheless, this fundamental aspect of physiology has remained largely unexplored. Neuroscientist Asya Rolls, will discuss the latest understanding of how of the brain influences our body's health.
